***Press release – 6-08-15: Martin Enterprises Signs New Packaging Contract with Chatsworth Products, Inc.***

Martin Enterprises recently signed a packaging contract with [www.chatsworth.com](http://www.chatsworth.com) (CPI) New Bern, N.C. location. The company, which is a global supplier of integrated solutions that optimize technology equipment, began 20 years ago when 90 employees joined together and bought out the Dracon Division of Harris Corporation using an Employee Stock Ownership Plan.

With deregulation in the telecommunications industry and technological innovation in voice and data equipment, CPI focused on the explosive needs of the information technology market to manage IT infrastructure equipment. This pioneering spirit is what motivates CPI to delight the customer by responding rapidly with tailored standard and custom solutions that provides a higher return on investment.

CPI's Core Values led them to engage Martin Enterprises in their endeavor to outsource packaging assembly parts for the products they manufacture. Being socially responsible, the employee-owned company wanted to support the mission of ME, which revolves around giving people with disabilities opportunities to have fulfilling lives. People in ME's programs want to be able to work and receive a paycheck. This new contract with CPI will add to this opportunity.

**CPI's Core Values**

- Fortright, ethical, and socially responsible
- Employee ownership: shared risks, responsibility, accountability and rewards
- Quality in all aspects of the company
- Adding value through people
- Teamwork, Caring and Commitment
- We're all in this together – mutual trust and respect
