

Press Release, 5-26-15: **Martin Enterprises
Lands New Kayak Contract**

A new kayak company, J. Design and Manufacturing, located in Bridgeton, NC has contracted with Martin Enterprises to assemble their first product line – the Tri-Kayak XS-1.

This Kayak is designed with the goal of being fast, stable and versatile and brings the very best water experience to any adventurer.

The unique, adjustable outrigger system of the XS-1 can be easily locked into several positions to provide a variety of “on the water” capabilities. The wide stance of the deployed outriggers takes the hassle out of launching – the stability makes getting in-and-out of the kayak a breeze. The outriggers were carefully designed not to obstruct paddling, and they tuck into the side of the main hull.

Martin Enterprises supplies on-site packaging, assembly, and storage to a variety of businesses and was referred to J. Design and Manufacturing by the local division of SBTDC – Small Business and Technology Development Center. “We are very excited to be involved with Jim Reynolds, Managing Director of J. Design and Manufacturing, on this endeavor,” says ME Director, Becky Bullock.

For additional information about Martin Enterprises visit www.martinenterprises.org and visit www.tri-kayak.com for more information about the kayak..
